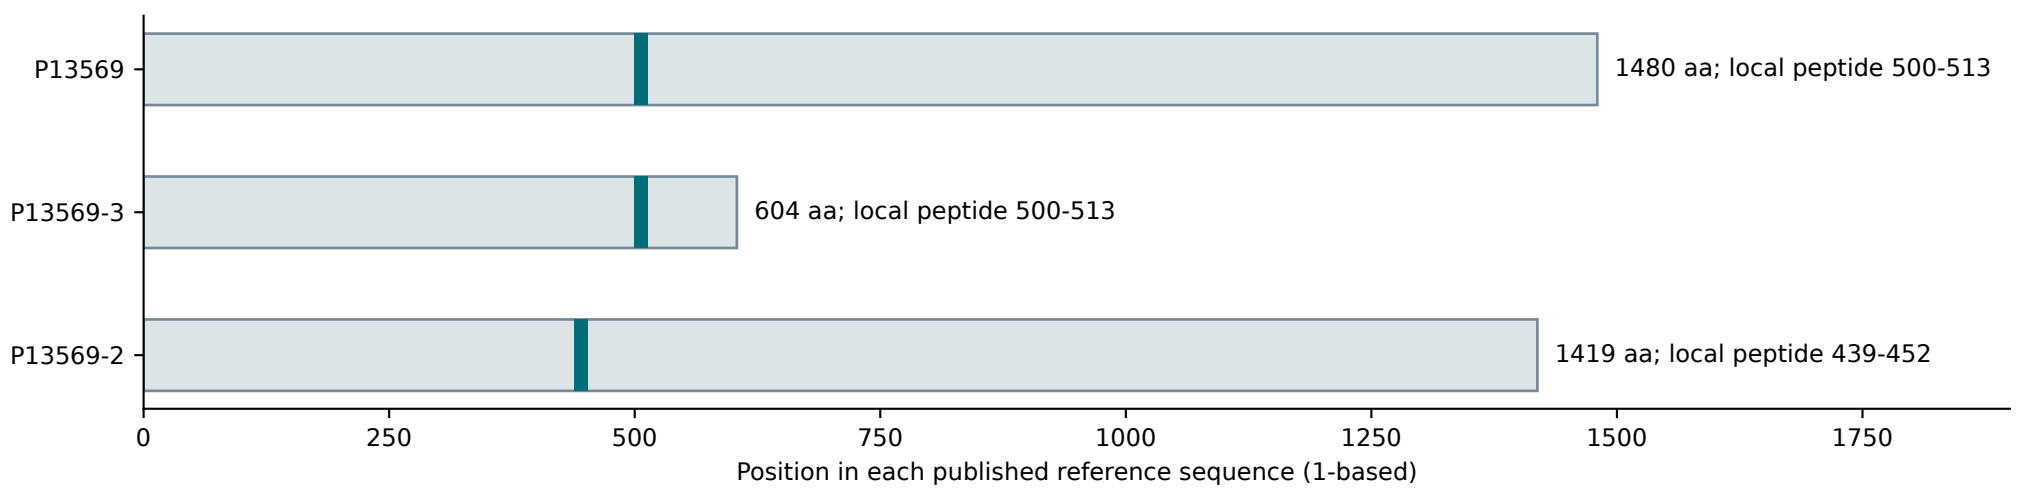
CRISPR P1 · supplementary molecular reference audit

A Same local peptide; five nucleotide differences

Residue	500	501	502	503	504	505	506	507	508	509	510	511	512	513
Peptide	G	T	I	K	E	N	I	I	F	G	V	S	Y	D
Canonical DNA	GGC	ACC	ATT	AAA	GAA	AAT	ATC	ATC	TTT	GGT	GTT	TCC	TAT	GAT
Programmed DNA	GGC	ACC	ATT	AAA	GAA	AAT	ATC	ATC	TTT	GGT	GTG	AGT	TAC	GAT

CDS c.1498-1539 | c.1521_1523del spans codons 507/508; SE2 changes are synonymous at 510-512.

B Equal local peptide does not identify the complete reference sequence



Reference context only: these isoforms are not assigned to the study samples, and no expression or channel function is inferred.
